-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Objections*

1. Claims 17 and 18 are objected to because of the following informalities: claim 17, "said temporary locking means" lacks antecedent basis; and claim 18, "said constant locking means" lacks antecedent basis. For examination purposes, claims 17 and 18 are assumed to depend from claim 14. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 and 7-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Teele (US#5123590).

4. Teele discloses a mail indicator assembly comprising: a mailbox 10 having a wall 12 and a base 13; a pivotal door 16; a display member 30 connected to the wall wherein the display member includes a rod 32 and a spring 34 connected to the mailbox via element 38; a notification latch, namely bracket 76, attached to the door to engage the display member when the door abuts the wall (Fig. 1); and a locking attachment being viewed as element 38 which is affixed to the mailbox (Fig. 3) and positioned to "restrain" the display member as it restricts the lower end of the display member from rotating relative to the mailbox (col. 4, lines 45-52), the display member engages the locking attachment indefinitely.

Art Unit: 3677

5. Regarding claims 4 and 12, the locking attachment is being viewed as a "bar" as element 38 is a rigid piece longer than it is wide and that is used as support (Merriam Webster's Collegiate Dictionary Tenth Addition) for the display member.

***Allowable Subject Matter***

6. Claims 6 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 14-20 are allowed.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hunt (US#4065050) discloses the benefit of locking a mailbox flag in a lowered position despite the position of the door. See PTO-892.
